# HOPE SOLUTION

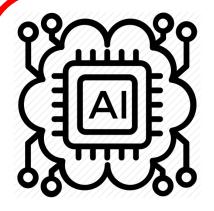

- Integrates data from various sources
- Visualize the key information in dashboards for decision makers
- Live monitoring and alerting for production performance
- Reporting System

## Cycle

### **BIG DATA**

### **Digital Data Integration (Hope Solution)**

- Data analytics
  - Machine learning (i.e. Problem identification, alert system)

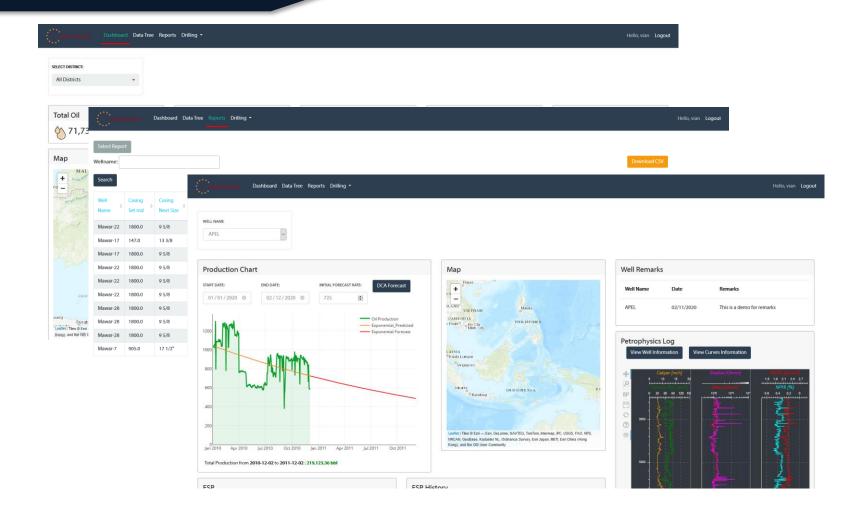

**Decision Making** 

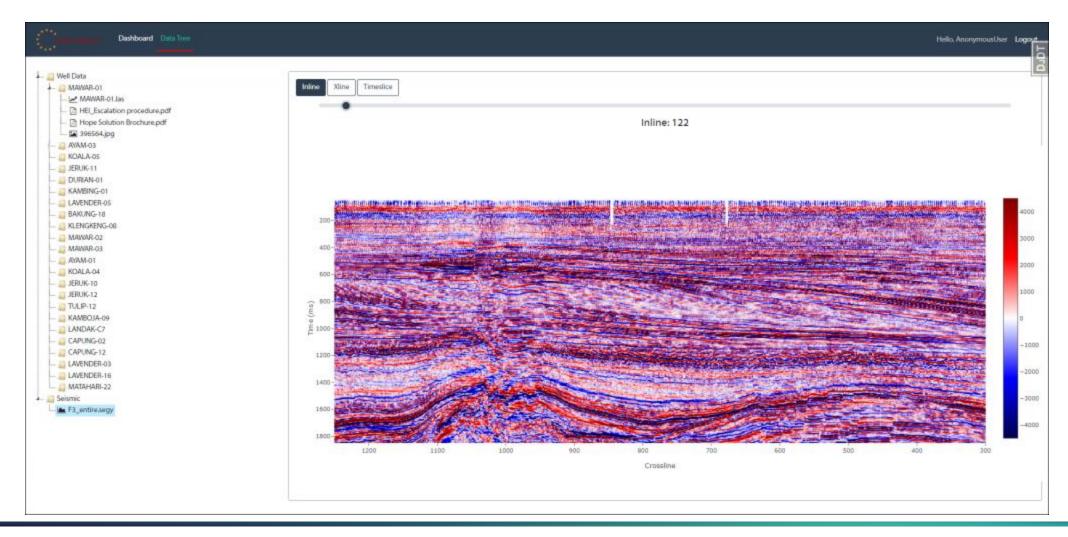

### Dashboard

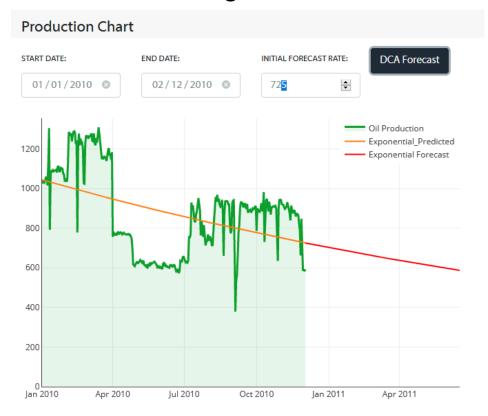

### Data Viewer

# Machine Learning

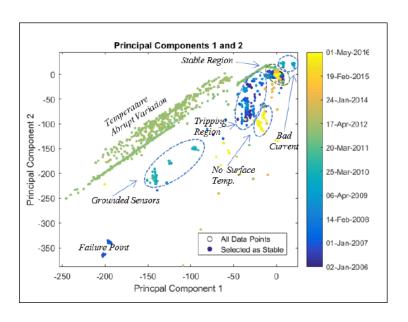

#### **Production forecasting**

Total Production from 2010-12-02 to 2011-12-02: 219,123.36 bbl

Production forecasting could be done in various ways using machine learning technique. i.e. DCA, Neural Network, etc.

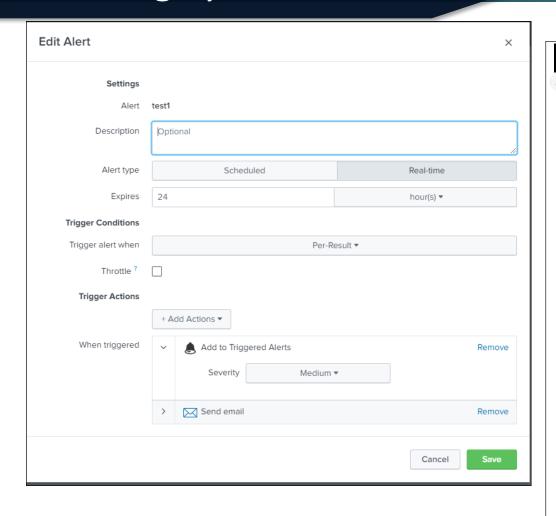

#### **ESP failure prediction**

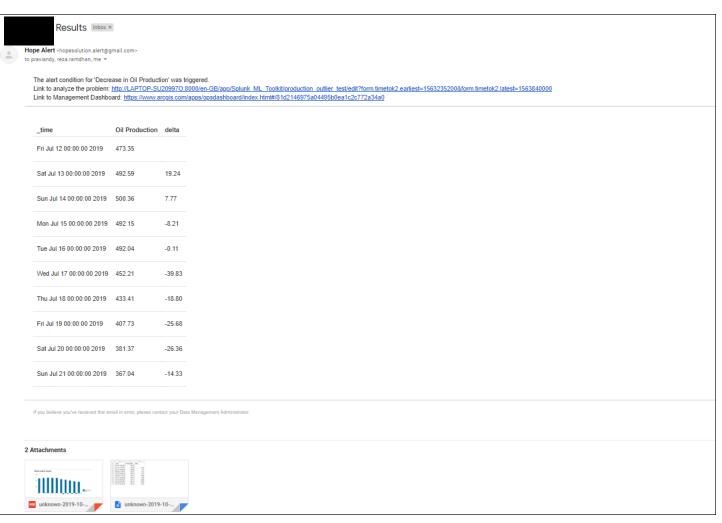

ESP Data Analytics: Predicting Failures for Improved Production Performance (Abdelaziz., et al., 2017)

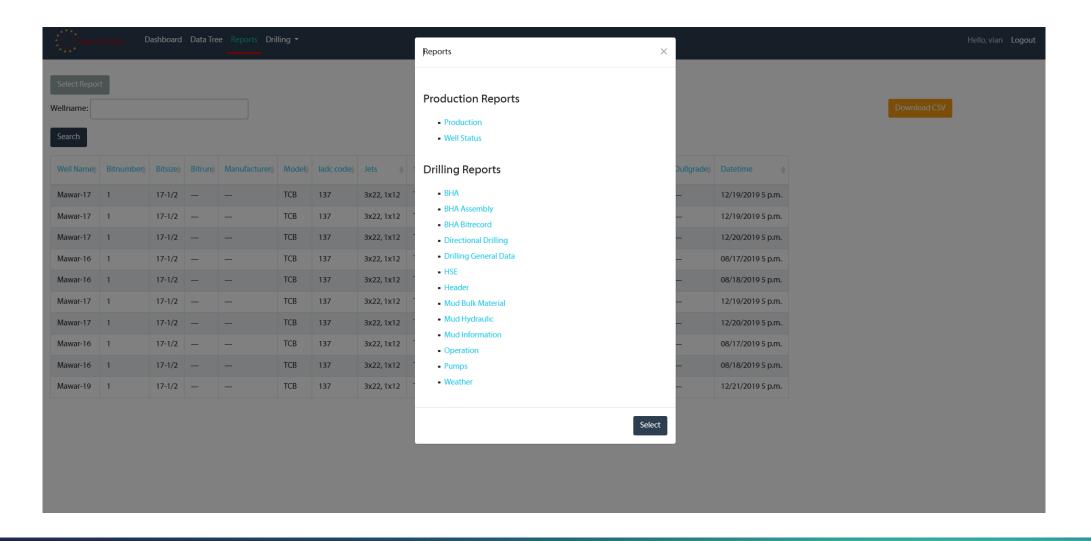

# Alerting System

### **Reporting System**

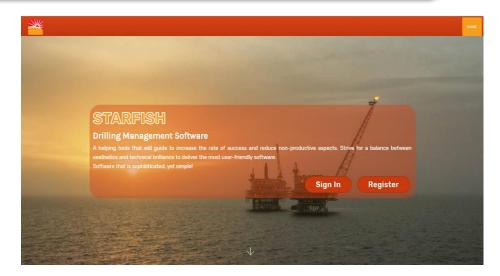

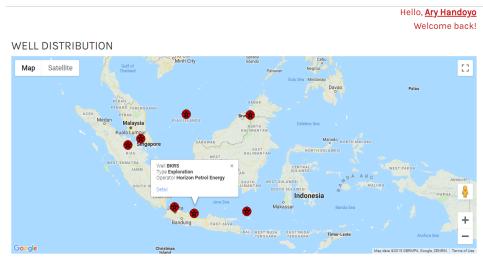

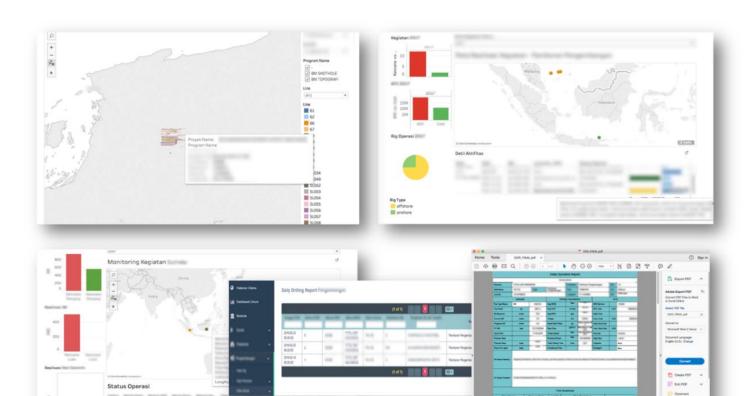

# OTHER PORTFOLIO

Several other portfolio on the projects I involved with in PT Horizon Perdana International
